Troy Ratcliffe  
Managing Director  
Arjobex America Inc.  
10901 Westlake Drive, Charlotte, N.C. 28273  
Dear Mr. Ratcliffe:

APR, the Association of Plastic Recyclers, is pleased to recognize Polyart's Uncoated Polyart for IML and pressure sensitive labelling applications and Coated Polyart for pressure sensitive and non-pressure sensitive labelling applications as meeting or exceeding the most strict APR HDPE Critical Guidance criteria HDPE-CG-01 Critical Guidance Protocol for HDPE Rigid Containers. This APR recognition is based on the technical recyclability of the label innovations, in the HDPE recycling stream.

A Review Committee, appointed per the APR Recognition Operating Procedures, reviewed your data submission and concluded the data were correctly obtained by a qualified laboratory and were completely presented to show the films submitted meet or exceed the most challenging test conditions and strictest APR Critical Guidance criteria.

The HDPE Critical Guidance documents that were used to evaluate the label innovations, are the product of a multi-industry consensus process to identify and address certain key technical considerations related to the recycling of postconsumer HDPE containers. The Documents direct innovators to conduct specific testing per established testing procedures and then provide the innovator with guidance to interpret the results. The protocols are intended to help improve the quality of the recycled PE film stream by aiding innovators to make informed decisions about the consequences of packaging innovations. APR thanks Arjobex, for voluntarily submitting this label film for Recognition. The impact of these protocols is beneficial to worldwide recycling efforts. Meeting the Critical Guidance Document is a truly significant step in demonstrating overall recyclability of your label innovations.

Our recognition applies only to the Polyart's Uncoated Polyart for IML and pressure sensitive labelling applications and Coated Polyart for pressure sensitive and non-pressure sensitive labelling applications. While this Recognition speaks to the compatibility of your innovation films, with HDPE container recycling, it does not speak to collection of films or include other film labels in the market that may conflict with the HDPE container recycling process. We encourage Arjobex to be sure in its packaging information that the public does not misunderstand that this Recognition applies to look alike film labels or to believe collection is happening when it is not.

Yours truly,

President and CEO
