

Poyart_® for wristbands

– the synthetic paper ——

Why Polyart?

Its properties are particularly well adapted to wristbands for special events, festivals, amusement parks, bars, sporting events...

- Polyart is tear resistant.
- Polyart resists water and many chemicals (chlorine).
- Polyart looks and feels like paper, it is soft and comfortable to wear.
- You can write on Polyart with a pen (phone number, contact...).
- Polyart is compatible with traditional printing technologies: offset, flexo... and with digital printing like UV inkjet, Xeikon Ice and HP Indigo with proper primer.
- Polyart can also be printed by thermal transfer printing with a wide range of ribbons for numbering, bar coding and personalisation.
- Excellent print quality, allows sharp printing with bright and attractive colours.
- Easy to die-cut.
- For enhanced security wristbands, Polyart is available with embedded security features and can be laminated to NFC chips.
- Polyart contributes to the respect of the environment. Recyclable, chlorinefree, its manufacturing process does not include harmful or polluting substances. Polyart is approved for food contact and toy applications.

Polyart synthetic paper consists of a matt coated HDPE film manufactured with a proprietary process, that gives the product its specific and unique properties and is recyclable.

It is manufactured by Arjobex a company of the group Polyart.

Polyart for wristbands

Tear resistant

Resistant to water and chemicals
